

# **Step By Step Ordering Instructions?**

## **Select Your Own Sheet Assortment**

***\* The Pick Your Own Assortment system replaces our old 50 and 100 sheet packs \****

***\* Oversized Woods and Oversized Iron Labels are now available on sheets \****

**1** There are 7 sheet types to choose from. The number of labels per sheet varies to allow all sheets to sell for the same price. All prices are computed per sheet, not per label. You may order any quantity of as many different label shapes as you wish but there is a 15 sheet minimum for the total package.

**2** Enter the number of each sheet type you want to order in the quantity box. Click on the "Calculate Totals" tab at any time to see the total number of sheets, total number of labels and the full package price. You may change the number of sheets ordered as often as desired and re-calculate as often as you wish. The system will compute the total price based on the Quantity Discount chart.

**3** To see the per sheet quantity price breaks, click on the "Discount Pricing" tab and the chart will appear. Discounts are automatically applied and recalculated every time you make a change. If you wish to start over prior to adding the pack to your cart, click on the "Clear All" tab and all fields will be set back to zero.

**4** Once your assortment is correct, click the "Add to Cart" tab. It will be added as one item and the contents will be printed on your confirmation. Once a sheet pack is added to your cart, it CANNOT be changed, it can only be DELETED.
